RESEARCH INTERESTS

My interests are broadly in the realm of **Quantum Networks** and **Quantum Cryptography**. I am focusing on hybrid quantum communication systems, which uses methods from both continuous and discrete variable quantum architectures. Previously, I worked on human purchase behavior and biomedical signal processing.

EDUCATION

North South University (NSU)

(Sep 2019 - Jun 2023)

B.S. in Computer Science and Engineering

GPA: 3.79/4.0

WORK EXPERIENCE

Research Assistant

April 2025 - June 2025

Supervisors: Dr. Abul Kalam Al Azad

NSU

- We are focusing on computational modeling of small, interconnected networks of neurons, known as motifs, to understand how neural networks function. Using electro-physiological models to simulate the behavior of individual neurons within these motifs, we are specifically looking at bursting spiking patterns. By analyzing these small networks, we aim to gain insights into the fundamental building blocks of larger, more complex neural systems. We are working towards developing deep neural models, which in turn can clearly predict the burst/spiking patterns.

Research Assistant

Feb 2024 - March 2025

Supervisors: Dr. Abul Kalam Al Azad, and Dr. Sifat Momen

NSU

- We worked on the behavioral research of e-commerce customer preferences, focusing on the Theory of Planned Behavior (TPB). The research concentrated on examining consumer attitudes and social norms that influenced online purchases in Bangladesh, with the objective of providing practical insights for business strategy.

TEACHING EXPERIENCE

Instructor

Feb 2024 - Dec 2024

Mahdy Research Academy

Remote

- I was tasked with teaching introductory quantum computation, cryptography, protocols such as BB84, B92, E91 and their applications using Qiskit, along with basic machine learning concepts and their practical applications in signal processing. Under the supervision of Dr. Mahdy Rahman Chowdhury, the teams are now conducting research on post quantum cryptography and biomedical signal processing.

Teaching Assistant

June 2022 - Sep 2022

Subject: MAT361(Statistics)

NSU

- I supported students with course-related inquiries, assisted faculties in preparing and managing course materials and assessments, and helped proctor examinations alongside faculty to ensure academic integrity.

PROJECTS

1. **ItihashQA**: An Open Source Conversational Question Answering System applied in the context of Bangladeshi History. This was the first ever Retrieval Augmented Generation model based on Bangladeshi data. [Github]

ACHIEVEMENTS

Magna Cum Laude, awarded by NSU

2024

Top 10 among 104 teams at Innovation Challenge(IC) organized by NSU ACM.

Spring 2023

SKILLS

Quantum Tools

Qiskit, Strawberryfields

Programming Languages

Python, C++

Machine Learning Tools

PyTorch, Sklearn

Web-dev Tools

Django, React
